EXECUTIVE SUMMARY

The Bartlesville Development Corporation (BDC) in Bartlesville, OK retained Garner Economics, LLC, a nationally known economic development consulting firm based in Atlanta, to update the BDC's current multiyear economic development strategy last completed in April of 2006. Our work focused on analyzing the community's

assets and challenges, industry targets Bartlesville should pursue, and overall recommendations for a successful proactive economic development effort.

We first analyzed the City's competitiveness. Our Competitive Realities report examined the issues that impact and determine economic competitiveness and community vitality for Bartlesville. Key demographic and economic indicators for the County (Washington) were compared to state and national trends as well as the comparison of Kansas City, Houston metro areas and the Tulsa Combined Statistical Area (CSA)¹, which were selected as benchmark communities by the BDC based on typical competitive markets to Bartlesville. Throughout this report the use of *Bartlesville* refers to Washington County, OK unless otherwise noted.

To enable readers a summary overview of the report's main findings, a set of dashboard icons is presented. Each finding has an accompanying icon to assist with interpretation. Readers are encouraged to review the supporting data in the full report to gain a more complete understanding.

Dashboard Indicator Legend:

Indicator that Bartlesville is better (more positive) compared to a majority of the benchmark geographies, or points to a positive trend within the City.

Indicator is neutral, neither positive nor negative. Indicator may represent an observation, or be in the middle of the benchmark geographies.

Indicator that Bartlesville is worse compared to a majority of the benchmark geographies, or points to a negative trend within the City.

¹ The geographic components of each benchmark community are included in the Appendix.

Demographic Dynamics

Bartlesville has experienced mild population growth over the last ten years, up a total of 3.5 percent since 1999. Overall, population growth trends have been below the state and nation, and all three of the benchmark communities (page 11).

Sources of population growth are balanced; over the period of 2000-2009, international migration accounted for 46 percent of net new residents, domestic in-migration was responsible for 31 percent, and natural growth the remaining 23 percent (page 12).

With 88.6 percent of the population categorizing themselves as white, the population of Bartlesville is relatively less diverse, although the Native American Indian population makes up a larger share of the total population than in the state, nation, and benchmark communities (page 14).

At 40.6 years, the median age in Bartlesville is above the state, nation, and benchmark communities, resulting in a high old-age dependency ratio (page 15).

Bartlesville has a lower proportion of its population ages 44 and below. Age groups 55 and older comprise a higher proportion of total population than in the other geographies, averaging 2 percentage points higher (page 17).

Bartlesville has a higher proportion of residents with educational attainment of bachelor's degree or higher than in the state and Tulsa CSA, but lower than in Houston, Kansas City, and slightly below the nation. At attainment of 87.6 percent, High school graduate or higher is higher than all geographies except Kansas City (page 18).

In 2009, ACT scores for Bartlesville High School were significantly above the state and nation. Bartlesville High's composite ACT scores ranked 16th among Oklahoma's 447 schools with published results (page 19).

Economic Dynamics

The current average wage per job is 12 percent below the nation, and lower than all other benchmarks but the state (page 22).

Over the last ten years, adjusted for inflation, the average wage per job has declined by 1.1 percent, and in the last five years has not changed (page 22).

Per capita income is 11 percent above the state and 1.3 percent above the nation (page 24).

The ten year rate of growth of per capita income outpaces all the benchmark geographies except Tulsa and the nation, and the five year rate outpaces all of the benchmark geographies (page 24).

Bartlesville has a significantly lower proportion of total income from earnings, 13.2 percentage points below the nation and 12 percentage points below the state. Likewise, at 29.5 percent, income from *Dividends, interest, & rent* make up a notably larger proportion of total income than in the state, nation and benchmark communities (page 27).

Bartlesville has largely avoided the multi-year job losses of the current recession, having experienced only five months with year-to-year losses since 2007. Bartlesville had the highest relative average employment growth rate in 2007 and 2009, and placed second only to Tulsa in 2008 (page 28).

Early 2010 trends show Bartlesville's employment growth rate below the state, Houston, and Tulsa (page 28).

Since 2006 Bartlesville has held the lowest unemployment rate among the other geographies (page 30).

The number of private business establishments peaked in the first quarter of 2008 at 1,252 and has since declined slightly by 2.5 percent or 31 fewer establishments (page 32).

Industry Dynamics

Relative to the benchmark geographies examined, Bartlesville has a significantly larger proportion of employment in *Natural Resources and Mining*, and has the smallest relative share in six of the remaining nine major industry sectors (page 34).

Relative to the benchmark geographies, Bartlesville has the lowest percentage of Federal and State Government employment, each comprising less than one percent of total employment. Conversely, Bartlesville has the highest share of private employment at 87.7 percent (page 34).

Over the last five years, net employment growth was experienced in 16 of the 19 major industry sectors. Growth was led by *Healthcare & social services* and *Retail* sectors (page 35).

Over the last five years, job losses have come primarily from the Natural Resources² sector, down by 445 jobs or 12 percent (page 35).

A wide difference exists between the highest earning industries and the lowest earning industries. Bartlesville's highest earning industry, *Natural Resources*, is more than 600 percent above the lowest earning industries, *Accommodation and food services* (page 37).

Industry Specialization

The *Natural Resources* sector exhibits a very high degree of local specialization. To a lesser degree, three other major industry sectors have high local specialization: *Utilities, Agriculture* and *Retail* (page 38).

Over the last five years, a majority of industry sectors experienced employment growth that exceeded both the Tulsa MSA and national industry-specific trends (page 43).

² Natural Resources is a major industry sector classification which includes oil and gas extraction and related business activities.

Labor Market Analysis

Relative to the state and nation, Bartlesville has a higher proportion of workers classified as *Self-employed workers in own (not incorporated business)*, and a lower relative proportion of persons classified as *Government workers* (page 44).

Sixty four percent of workers in Washington County also live in Washington County. Fifty two percent of workers in Bartlesville City also live in Bartlesville City (page 45).

Tulsa County is the top source of in-commuters, and also the top location for Washington County's workers who out-commute for employment (page 45).

Among all 23 major occupational groups, Bartlesville exhibited strong local specialization in only one area, *Management* (page 48).

Among 84 sub-groups occupations; 18 exhibit high local specialization. Generally, the strongest occupational specialization is clustered in management, healthcare, office & administrative support, construction & extraction, and production (page 48).

Our **Assets and Challenges Assessment** serves as in depth analysis of Bartlesville using 85 screening factors or variables. This assessment is based on a review of economic and demographic characteristics, input from the BDC, interviews with local business and community leaders and the consulting team's experience working with communities across the country and corporate clients globally. This is normally the second step in a review of a City by a site selection consultant should a City make the initial cut. Our summary of Bartlesville's Assets and Challenges follows and the full analysis can be seen further in this report:

Challenge	Neutral	Asset
Well positioned to serve international markets	Centrally located for national market	Centrally located for major regional market
Port facilities	Common carrier trucking	Availability of technicians and scientists
Availability of unskilled and semi- skilled workers	Interstate highways	Quality of labor-management relations
Availability of engineering program	Rail service	Availability of post-secondary vocational training
Availability of forest products	Scheduled airfreight services	Availability of on-the-job training assistance
Availability of water/cost of water/sewer	Within 1 hour of commercial air passenger service	Within $\frac{1}{2}$ hour of major university / college

Level of awareness of community regarding economic development	General aviation airport capable of handling corporate aircraft	Availability of agricultural products for food processing
Availability of fully served and attractive office sites	Local telephone company's capacity for simultaneous voice/data transmission and high speed internet services	Availability of minerals
Availability of suitable office space	Connection of local telephone company to national fiber optics network	Availability of business and professional services
Availability of adequate wastewater treatment capacity	Availability of skilled industrial workers	Local economic development organization has a strategic plan
Presence of major sporting events	Availability of skilled clerical workers	Level of leadership support of economic development program
Availability of major shopping facilities	Availability of managerial personnel	Level of funding for local economic development program
	Cost of labor	Availability of fully served and attractive industrial sites
	Cooperation of local state employment office in recruiting and screening applicants	Availability of low interest loans for small business
	Availability of intermediate manufactured goods and supplies	Availability of relocation incentives for transferees
	Availability of manufacturing	Quality of local elementary and
	processes	secondary education
	Cost of electricity for industrial use	Quality of post-secondary education
	Availability of high quality electric service	Cost of housing
	Availability of uninterruptible natural gas	Level of cultural activity
	ilaturai gas	
Challenge	Neutral	Asset
Challenge	-	Asset Availability of first-class hotels, motels and resorts

Lastly, from all of the research noted previously, we were able to identify the **optimal business targets** for Bartlesville. A summary of these targets are shown graphically with more detail in the full report.

	Bartle	esville Optimal T	argets	
Technical Environmental Services	Distribution & Logistics	Shared Back-Office Services	Instrumentation Control Systems	Tourism Development
		Subsector Targets		
↓	↓	↓	↓	ļ
 Environmental consulting services Scientific research and development services Geophysical surveying and mapping services Laboratory Testing Services Self-Employed Entrepreneurs 	 Freight Packing & Logistics Services General warehousing and storage Refrigerated warehousing and storage General wholesaling 	 Office administrative services Payroll & Bookkeeping Services Computer systems design and related services 	 Electronic instrument manufacturing Industrial valve manufacturing Electrical equipment manufacturing Engineering services 	 Cultural Tourism Destination Tourism

Our **Conclusions and Recommendations** can be found in detail beginning on page 63. A summary of these recommendations follow with the table below.

Recommendations for action are categorized under three areas of opportunity:

Organizational
Product Marketing
Product Improvement

The "Product" is considered Bartlesville.

Organizational	Product Marketing	Product Improvement
Chamber of Commerce should take the lead with retail promotion	Market itself as the Energy Innovation or Energy Research Corridor	Satellite campus of the University of Oklahoma's Mewbourne School of Petroleum and Geological Engineering
BDC should consider hiring one additional staff person that would serve as a project manager to direct the BDC's external marketing and sales efforts	Conduct a multi faceted print and electronic media campaign to the targeted industry sectors	BDC should either partner with a developer or undertake alone the development of a flexible office building
CVB should consider having a visitor's center kiosk at Woolaroc and at the Phillips Petroleum Company Museum	Visitations should occur with those companies that have been qualified from Whittaker	Wireless should be repaired in the central business district
	Web site needs to be designed to offer the resources that your specific audience's need	Venture capital fund or Angel network
	US HWY 75 from Tulsa to Bartlesville designated as an Interstate spur by the US Department of Transportation	Water supply enhancements
	Produce new collateral material that will effectively promote Bartlesville	Public Transportation
	Annual familiarization tour (FAM)	

Bartlesville is a unique community. Its economy is centered on the petroleum industry from the founding of Phillips Petroleum in 1905 and now through the merger of Conoco to form ConocoPhillips (CP). But with all communities that have an economy centered on one particular industry sector, it suffers boom and bust cycles and Bartlesville has not been immune to that. Additionally, many support businesses operate in Bartlesville because of ConocoPhillips, so the multiplier effect as a result of CP's presence is significant. But with any community that wants to help direct its economic destiny, Bartlesville must constantly and continually work to diversify its economic sectors and not be totally dependent on a single employer.

Bartlesville must look forward and recognize that to succeed it cannot be business as usual. It must be prepared to accept rapid change from the impact of a constantly evolving global economy. It should celebrate success with business locations and expansions no matter what size.

These are the themes that we have heard and observed. Now we challenge Bartlesville and the region to move forward with these recommendations.

INTRODUCTION AND METHODOLOGY

The Bartlesville Economic Development Commission (BDC) retained Garner Economics, LLC in January of 2010 to develop a multiyear economic strategy focusing on the community's assets and challenges, industry targets the City should pursue, and overall recommendations for a successful proactive business development effort.

To understand where you wish to be as a community, you must appreciate the historical context of what characteristics have brought your respective community to where you are today. Stephen Covey has said, "Seek first to understand" and our mission to conduct an economic strategy for Bartlesville uses his mantra of understanding the past and knowledge of today before you can plan for the future.

Our Assets and Challenges assessment, also referred to as a SWOT Analysis (strengths, weaknesses, opportunities and threats) allows us to document what problems exist in the City that constitutes barriers for successfully achieving the vision of its leadership.

Garner Economics conducted an assessment of the community from a corporate site selector's perspective. The objectives of this assessment were to:

- Identify key strengths to emphasize in economic development marketing efforts, and;
- Identify key weaknesses that may limit investment in Bartlesville so that remediation of these local challenges may occur.

Our approach began with interviews and focus group of over 45 people representing large and small employers, academia and elected officials. This gave us an overview of how local businesses and residents evaluate the business climate of Bartlesville. We then evaluated the opportunities and challenges in Bartlesville to serve as a "snapshot", and highlight information of concern to business leaders, site selectors, and other economic decision makers. Garner Economics evaluated the area's performance in a number of data trends and other factors that, taken as a whole, provide a condensed and candid assessment of Bartlesville's overall competitiveness and economic performance.

The findings, conclusions and recommendations of Garner Economics are contained in this report. The report is structured as to identify what issues are or have been impediments to growth in the City, what assets exist as it relates to economic development, and then recommendations to take the area to its next level in economic development. Garner Economics especially appreciates the assistance of the BDC and Nora Wegener, Executive Assistant of the BDC in providing logistical assistance and with David Wood, President of the BDC.

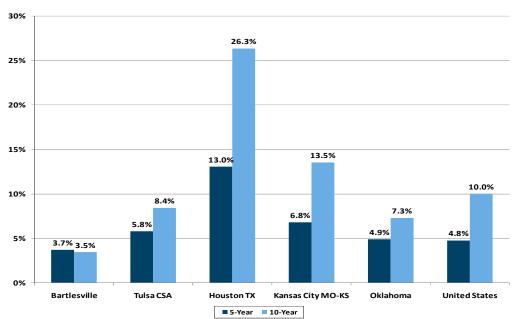

AN ECONOMIC ANALYSIS OF BARTLESVILLE

DEMOGRAPHIC DYNAMICS

Population Growth

According to the U.S. Census Bureau, as of 2009 Bartlesville's population totaled 50,706. The figure is 1,816 persons or 3.7 percent more than five years earlier. Bartlesville has experienced mild population growth over the last ten years, up a total of 3.5 percent since 1999. Overall, population growth trends have been below the state and nation, and all three of the benchmark communities (Figure 1 and Table 1). Over the last ten years, total population in Bartlesville declined in five of the first six years, but rebounded in the last four years.

Oklahoma	3,687,050	249,903	7.3%	172,601	4.9%

Source: U.S. Census Bureau

Sources of Population Change

Population change has three major sources: 1) natural (births minus deaths), 2) domestic migration, and, 3) international migration³. The leading contributor to changes in Bartlesville's population is international migration (Figure 2 and Table 2). Over the period of 2000-2009, international migration accounted for 46.3 percent of net new residents. Domestic in-migration was responsible for 30.7 net new residents, and natural growth the remaining 23.1 percent. In six of the last ten years, domestic migration has been negative (out-migration exceeding in-migration). Compared to benchmarks, Bartlesville had the highest total share of population growth from international and domestic in-migration, and the lowest due to natural growth (Figure 3 and Table 3).

Age

Median Age

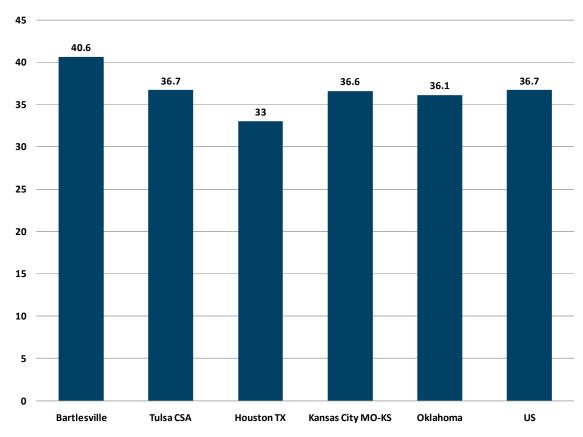

At 40.6 years, the median age in Bartlesville is above the state, nation, and benchmark communities (Figure 4 and Table 5). The effect of the higher age can be observed in a

⁴Throughout this report data will be used from the Census Bureau's 2006-2008 American Community Survey (ACS). The three-year estimates are based on on-going data collected between January 2006 and December 2008. Data are largely collected by mail with Census Bureau field representatives following up by telephone and/or personal visit with addresses that do not respond. The multiyear estimates are used to reduce statistical margin of errors. This data is separate from the decennial census.

Age Groups

Generally, Bartlesville has a lower proportion of its population ages 44 and below (Table 7). Ages less than 15 are particularly underrepresented, averaging 3.4 percentage points below the other geographies. Age groups 55 and older comprise a higher proportion of total population in Bartlesville than in the other benchmark geographies, averaging 2 percentage points higher.

Educational Attainment

Comparing levels of educational attainment reveals a largely mixed comparison among Bartlesville residents ages 25+ and other benchmark geographies. Worth noting, bachelor degree attainment is higher than the state, nation and two of the three benchmark communities, although *Graduate or professional degree* attainment is slightly lower than in all geographies (Table 8).

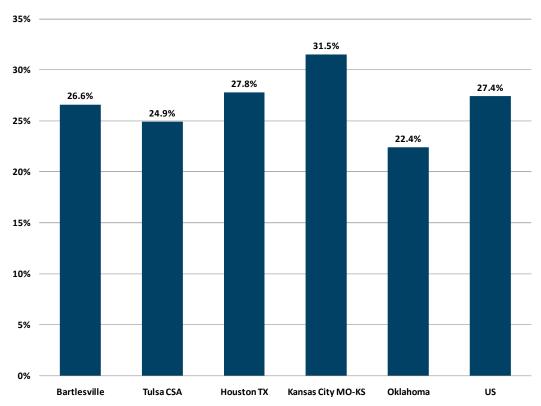

In summary, Bartlesville has a higher proportion of educational attainment *bachelor's degree* or *higher* than in the state and Tulsa CSA, but lower than in Houston, Kansas City, and slightly, the nation (Figure 6 and Table 9). At attainment of 87.6 percent, *High school graduate or higher* in Bartlesville is higher than all geographies except Kansas City.

Table 8 Educational Attainment Percent Total, Age 25+ (2006-2008)

Public Education Indicators

Public education indicators are a means to measure education quality across various geographies. The national indicators are broad, and at best would indicate further examination at points of significant deviation (Table 10).

Table 10
Public Education Indicators

	Student/Teacher Ratio (07-08)	Total Current Expenditures Per Pupil (06-07)	Instructional Expenditures Per Pupil (06-07)

ACT Scores

The ACT (American College Testing) test is a standardized test for college admissions in the United States, and a widely excepted measure of education quality. ACT scores are especially relevant to businesses because they provide a measure of the "final product" of public schools, and the educational quality of those entering the workforce. Unfortunately ACT scores are not readily available for all school systems nationwide.

In 2009 ACT scores for Bartlesville High School were significantly above the state and nation (Figure 7 and Table 11). Bartlesville High's composite ACT scores ranked 16th among Oklahoma's 447 schools with published results.

ECONOMIC DYNAMICS

Average Wage per Job

According to the U.S. Bureau of Economic Analysis, in 2008, Bartlesville's average wage per job equaled \$40,728⁷. Bartlesville's current figure is 7 percent above the state and 12 percent below the nation. Over the last ten years, the nominal (unadjusted for inflation) average wage per job in Bartlesville has increased by 30.7 percent; the pace is below the state, nation, and benchmark communities (Figure 8 and Table 12). Over the five most recent years, the rate of growth is also below all the comparison geographies.

Correcting growth in the average wage per job to real values (adjusting for inflation) provides a more realistic view of the actual spending value of the wage dollars. Over the last ten years, the real (adjusted for inflation) average wage per job in Bartlesville has declined by 1.1 percent, and in the last five years has held to no change (Figure 9 and Table 13). The inflation adjusted ten and five-year rates of growth are below the state and nation.

Source: U.S. Bureau of Economic Analysis

.

⁷ Average wage per job is wage and salary disbursements divided by the number of wage and salary jobs (total wage and salary employment). Wage and salary disbursements consists of the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; and receipts in kind, or pay-in-kind, such as the meals furnished to the employees of restaurants.

Per Capita Income

According to the U.S. Bureau of Economic Analysis, in 2008 Bartlesville's per capita income equaled \$40,704⁸. Bartlesville's most current figure is 11.6 percent above the state and 1.3 percent above the nation. Over the last ten years, nominal (unadjusted for inflation) per capita income in Bartlesville has increased by 55.8 percent, and in the last five years by 36.2 percent. The ten year rate of growth is above the state, nation and Kansas City, while the five year rate is above all the other geographies (Figure 10 and Table 14).

Correcting the growth in per capita income to real values (adjusting for inflation) provides a more realistic view of the actual spending value of the income dollars. Over the last ten years, real (adjusted for inflation) per capita income in Bartlesville has increased by 17.9 percent, and in the last five years has experienced an increase of 16.4 percent (Figure 11 and Table 15). The ten year rate of growth outpaces all the geographies except Tulsa and the nation, and the five year rate outpaces all the other geographies.

8

⁸ Per capita income is the income that is received by persons from all sources. It is calculated as the sum of wage and salary disbursements, supplements to wages and salaries, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance. This measure of income is calculated as the personal income of the residents of a given area divided by the resident population of the area.

Components of Personal Income

An examination and comparison of the major sources that comprise personal income shows that at 53.4 percent, Bartlesville has a significantly lower proportion of total income from earnings, 13.2 percentage points below the nation and 12 percentage points below the state (Figure 12 and Table 16). Likewise, at 29.5 percent, income from Dividends, interest, & rent make up a notably larger proportion of total income in Bartlesville relative to the state, nation and benchmark communities.

Employment Trends

According to the Bureau of Labor Statistics, as of April 2010, total employment in Bartlesville equaled 26,832. April's employment number is down 0.6 percent or 162 fewer jobs than one-year earlier. Bartlesville has largely avoided the multi-year job losses of the current recession, having experienced only five months with year-to-year losses since 2007 (Figure 13 and 14). By contrast the U.S. has experienced 24 months of job losses, and Oklahoma 17. Bartlesville had the highest relative average employment growth rate in 2007 and 2009, and placed second only to Tulsa in 2008 (Table 17). Early 2010 trends show Bartlesville's growth rate below the state, Houston, and Tulsa.

Number of Private Business Establishments

Tracking the number of private business establishments is a broad indicator of entrepreneurial and attraction activity. The data does not include one-person businesses. As of the third quarter of 2009, there were 1,221 private business establishments in Bartlesville. The number of establishments peaked in the first quarter of 2008 at 1,252 and has since declined slightly by 2.5 percent or 31 fewer establishments (Figure 17). Over the last five-year period *Accommodation and Food Services* saw the largest increase in number of establishments, up 23 establishments to a total of 106 (Table 19). *Retail Trade* experinced the largest decline in number of establishments, down 15 to a total of 178.

INDUSTRIAL DYNAMICS

Major Private Industry Composition

Examining the composition of major private industry employment relative to the other geographies, Bartlesville has a significantly larger proportion of employment in *Natural Resources and Mining* (Table 20). Conversely, Bartlesville has the smallest share in six of the remaining nine sectors.

Table 20
Industry Composition Percent of Total Private Employment

Major Industry Change

Over the last five years in Bartlesville, net employment growth was experienced in 16 of the 19 major industry sectors (Figure 18 and Table 22). Growth was led by *Healthcare & social services* and *Retail* sectors, with gains of 403 and 392 jobs respectively. Job losses have come primarily from the *Natrual Resources* sector, down by 445 jobs or 12 percent.

INDUSTRIAL SPECIALIZATION

Industry Specialization Screening

The economy of Bartlesville has several areas of distinct industrial specialization. Specialization is identified by measuring industry employment concentration relative to the nation by means of location quotients (LQ).¹⁰ The *Natural Resources* sector exhibits a very high degree of specialization, with a LQ of 19.2 (Figure 20 and Table 24). To a lesser degree, three other major industry sectors have high local specialization: *Utilities, Agriculture,* and *Retail*.

4

¹⁰ To measure local specialization, location quotients (LQs) for each industry classification were derived. LQs are ratios of an area's distribution of employment for a specific industry compared to a reference or base area's distribution. In this analysis the reference area is the U.S. If an LQ is equal to 1, then the industry has the same share of its area employment as it does in the reference area. An LQ greater than 1 indicates an industry with a greater share of the local area employment than is the case in the reference area and implies local specialization. LQs are calculated by first, dividing local industry employment by the all industry total of local employment. Second, reference area industry employment is divided by the all industry total for the reference area. Finally, the local ratio is divided by the reference area ratio.

A comprehensive screen detailing indicators of specialization among industry **subsectors** in Bartlesville, including job growth trends, LQ, earnings and the number of firms is presented in Table 25. Highly specialized (LQ greater than 1.2), and high relative earnings (>\$41,035, the industry average in Bartlesville) are highlighted in green.

Major Industry Competitive Advantage Screening

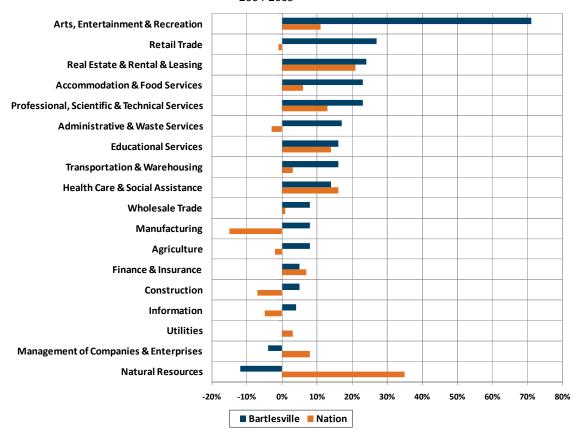

A comparison of major industry sector change between Bartlesville, the Tulsa MSA and the nation, reveals a majority (12 of 19) experienced employment growth rates that exceeded industry-specific trends in both the Tulsa MSA and nation (Figure 21 and 22). The analysis may indicate the presence of a unique competitive advantage for those industries in Bartlesville. The local *Natural Resources* sector, declined by 12 percent over the five-year period, in spite of a increases in both the Tulsa MSA and nation.

LABOR MARKET ANALYSIS

Class of Worker

Relative to the state and nation, Bartlesville has a higher proportion of workers classified as *Self-employed workers in own (not incorporated business)*. Conversely, Bartlesville has a lower relative proportion of persons classified as *Government workers* (Table 26).

Table 26 Class of Worker (2006-2008) By Percent of Total

	Bartlesville	Tulsa CSA	Houston TX	Kansas City MO-KS	Oklahoma	US
Private wage and salary workers	79.4	82.0	81.2	81.3	75.5	78.7
Government workers	10.5	11.0	11.7	12.9	16.6	14.5
Self-employed workers in own (not incorporated) business	9.9	6.7	6.9	5.7	7.6	6.6

Worker Flows

In 2008, 52 percent (6,986) of workers in the City of Bartlesville also lived in the City. More than 7,100 workers who lived in Bartlesville City out-commuted for employment outside the area (Figure 23). Washington County residents who do not live within the City are the top source of in-commuters, supplying 12.7 percent or 1,689 of Bartlesville City's workforce (Table 27). Tulsa County is the top location for Bartlesville City's resident workers who outcommute for employment, attracting 2,913 Bartlesville residents (Table 28).

In 2008, 64 percent (10,287) of workers in Washington County also lived in Washington County. More than 8,800 workers who lived in Washington County out-commuted for employment outside the area (Figure 24). Tulsa County is the top source of in-commuters, supplying 7.7 percent or 1,222 of the county's workforce (Table 29). Tulsa County is also the top location for Washington County's resident workers who out-commute for employment, attracting 4,122 county residents (Table 30).

Occupational Specialization

Similar to industry specialization, occupations can be measured for high local concentration. Similar to the industrial analysis, occupational specialization is identified by measuring occupational concentration relative to the nation by means of location quotients (LQ). Occupations with high location quotients (over 1.2) reflect a high degree of local specialization. These occupational strengths reflect a pool of specific workforce skills, education, or experiences. Among the 23 major occupational groups, Bartlesville exhibited strong local specialization in only one area, *Management* (Figure 25 and Table 31):

An examination of 84 occupational sub-groups in Bartlesville reveals 18 with high specialization, highlighted in green in Table 32. Generally, the strongest occupational specialization is clustered in management, healthcare, office & administrative support, construction & extraction, and production.

The Appendix list all 300+ occupations in Bartlesville and the degree of specialization for each.

COMPETITIVE ASSESSMENT OVERVIEW

Our Assets and Challenges Assessment for Bartlesville centered on the principle of indentifying the strengths of the community to attract and retain investment so those assets can be marketed proactively. Likewise, we identified those challenges that may be impediments to growing the City economically, so that they may be remedied over time.

Garner Economics conducted an in depth analysis of Bartlesville using 85 screening factors or variables. This assessment is based on a review of economic and demographic characteristics, input from the BDC, interviews with local business and community leaders and the consulting team's experience working with communities across the country and corporate clients globally. This is normally the second step in a review of a City by a site selection consultant:

COMMUNITY ASSETS AND CHALLENGES ASSESSMENT FOR BARTLESVILLE

Date conducted: 04/21/2010

Access to Markets	Challenge ¹¹	Neutral ¹²	Asset ¹³
Centrally located for major regional market			✓
Centrally located for national market		✓	
Well positioned to serve international markets	✓ ¹⁴		
Common carrier trucking		✓	
Interstate highways		✓ ¹⁵	
Rail service		✓	
Port facilities	✓		
Scheduled airfreight services		✓	
Within 1 hour of commercial air passenger service		√ 16	
General aviation airport capable of handling corporate aircraft		√	

 $^{^{11}}$ Challenge is defined as a weakness of a specific variable determined by Garner Economics either objectively or subjectively. A challenge is an impediment to economic development success.

¹² Neutral is defined as a variable that is not a challenge to economic development but is considered normal in the realm of economic analysis.

¹³ Asset is defined by Garner Economics as a variable that is ranked exemplary and as such should be marketed or noted as such.

 $^{^{14}}$ There are no port facilities in Bartlesville, including intermodal, which allow for the facilitation of international

¹⁵ US 75 runs N/S from Tulsa and is four lane, but not limited access.

¹⁶ Tulsa International Airport is 45 minutes away.

Local telephone company's capacity for simultaneous voice/data transmission and high speed internet services		√	
Connection of local telephone company to national fiber optics network		√	
LABOR	Challenge	Neutral	Asset
Availability of unskilled and semi-skilled workers	✓ ¹⁷		
Availability of skilled industrial workers		✓	
Availability of skilled clerical workers		✓	
Availability of technicians and scientists			✓ ¹⁸
Availability of managerial personnel		✓	
Cost of labor		✓	
Quality of labor-management relations			✓
Availability of post-secondary vocational training			√ 19
Availability of on-the-job training assistance			✓
Within 1/2 hour of major university/college			✓ 20
Availability of engineering program	✓		
Cooperation of local state employment office in recruiting and screening applicants		✓	
Access to Resources	Challenge	Neutral	Asset
Availability of forest products	✓		
Availability of agricultural products for food processing			✓ 21
Availability of minerals			✓
Availability of intermediate manufactured goods and supplies		✓	
Availability of manufacturing processes		✓	
Availability of business and professional services			✓ 22
Cost of electricity for industrial use		✓	
Availability of high quality electric service		✓	

¹⁷ In our interviews with local employers, each expressed frustration in the ability to recruit and retain employees that are paid a base wage of \$12.00 or less per hour. All of the respondents said they had no difficulty finding labor at \$20 per hour. ¹⁸ ConocoPhillips has their research center in Bartlesville.

¹⁹ Tri County Technology Center gets high marks from local employers.

²⁰ Bartlesville has both Oklahoma Wesleyan University and Rogers State University.

²¹ Cattle and grain are prevalent in the region.

²² ConocoPhillips has their global systems and services center in Bartlesville employing 2500 people.

Availability of uninterruptible natural gas		✓	
Availability of water/cost of water/sewer	✓ 23		
LOCAL ECONOMIC DEVELOPMENT PROGRAM	Challenge	Neutral	Asset
Adequate level of professional staff		✓	
Involvement of both public and private sectors		✓	
Local economic development organization has a strategic plan			√
Level of leadership support of economic development program			✓
Level of cooperation between various organizations involved in economic development activity		✓	
Level of awareness of community regarding economic development	✓ 24		
Level of funding for local economic development program			✓ ²⁵
ACCESS TO SPACE	Challenge	Neutral	Asset
Availability of fully served and attractive industrial sites			✓
Availability of fully served and attractive office sites	✓		
Reasonably priced sites		✓	
Availability of suitable industrial space		✓	
Availability of suitable office space	√ 26		
ACCESS TO CAPITAL	Challenge	Neutral	Asset
Availability of tax-exempt financing for new industrial facilities		✓	
Availability of low interest loans for small business			✓
Availability of venture capital from local sources for business startups		✓	
GOVERNMENT IMPACT ON BUSINESS	Challenge	Neutral	Asset

Variety of local restaurants	✓		
Appearance of the Central Business District			✓

There are compelling reasons why people and businesses are attracted to Bartlesville as their location of choice. There are few challenges (9) that evaluated overall, are not major impediments to economic growth in Bartlesville.

OPTIMAL INDUSTRY TARGETS FOR BARTLESVILLE

Optimal industry target selection is based on the site-specific characteristics of Bartlesville. Using results from the economic and competitive assessments, five industry targets were chosen that best match the unique competitive advantages in Bartlesville to the needs of particular industry sectors. Each sector selected has a record of above-average wages, and participation in commercial activities that will create wealth in Bartlesville.³² Because economies are dynamic and impossible to predict, these five targets offer opportunities across several non-competing sectors, affording a means to diversify economic development strategies and avoid risky overconcentration.

³⁰ Bartlesville, OK, violent crime, on a scale from 1 (low crime) to 10, is 3. Violent crime is composed of four offenses: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. The US average is 3. Sperling's 2010.

Bartlesville, OK, property crime, on a scale from 1 (low) to 10, is 5. Property crime includes the offenses of burglary, larcenytheft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. The US average is 3. Sperling's 2010.

³¹ Air quality in Bartlesville, OK is 66 on a scale to 100 (higher is better). This is based on ozone alert days and number of pollutants in the air, as reported by the EPA.

³² Local wealth creation is driven by exporting value-added products and services, or in some cases by importing outside dollars via activities such as tourism. All other activities, which primarily serve the local market, such as retail, would not be considered as viable industry targets for recruitment or expansion.

Bartlesville Optimal Targets

Technical Environmental Services

Distribution & Logistics

Shared Back-Office Services

Instrumentation Control Systems

Tourism Development

Subsector Targets

- Environmental consulting services
- Scientific research and development services
- Geophysical surveying and mapping services
- Laboratory Testing Services
- Self-employed Entrepreneurs

- Freight Packing & Logistics Services
- General warehousing and storage
- Refrigerated warehousing and storage
- General wholesaling

- Office administrative services
- Payroll & Bookkeeping Services
- Computer systems design and related services

- Electronic instrument manufacturing
- Industrial valve manufacturing
- Electrical equipment manufacturing
- Engineering services

- Cultural Tourism
- Destination Tourism

OPTIMAL INDUSTRY TARGETS

- Technical/Environmental Services
- 2. Distribution & Logistics
- Shared/Back-Office Services
- 4. Instrumentation/Control systems
- 5. Tourism

Technical/Environmental Services

Bartlesville is well positioned to leverage its local expertise in specialized energy-related research & development with the growing demand by government and private industry for technical/environmental consultation, interpretation and analysis. This industry lends itself well to self-employed entrepreneurs who can capitalize on skills developed within previous corporate employment.

Major Activities and Services:

Provide advice to businesses and governments on environmental issues, such as the control of environmental contamination from pollutants, toxic substances and hazardous materials.

Identify problems, measure and evaluate risks and recommend solutions.

Provide advice and assistance to businesses and other organizations on scientific and technical issues.

Gather, interpret, and map geophysical data.

Locate and measure the extent of subsurface resources, such as oil, gas, and minerals.

Perform physical, chemical and other analytical testing services for commercial purposes. Much of the testing in this sector involves the maintenance of environmental, industrial and product standards and government regulations.

Rationale:

- High local industry and occupational specialization
- Unique energy industry network/cluster
- Presence of ConocoPhillips research & development operations.
- Petroleum & Chemical Engineering Programs at University of Tulsa, University of Oklahoma Norman Campus, and Oklahoma State University-Main Campus
- Applied Technology program at Rogers State University
- Business incubator at Tri-County Technology Center for entrepreneurial development

Table 33 Technical/Environmental Services U.S. Overview

Industry	NAICS Code	2010 National Employment	5-Year Projected Percent Change	National Earnings Per Workers
Environmental consulting services	54162	164,944	21%	\$55,511
Scientific research and development services	5417	694,456	13%	\$106,884
Geophysical surveying and mapping services	54136	23,498	21%	\$68,264
Laboratory Testing Services	54138	152,641	7%	\$73,457

Shared/Back-Office Services

Bartlesville has a competitive advantage in performing various high-end Shared/Back-Office Services activities that are typically outsourced by firms seeking particular cost-savings or local expertise. Currently many industries are in a period of significant economic transformation; seeking fresh strategies and new efficiencies. The presence of ConocoPhillips IT services, high

occupational specialization, and Bartlesville's unique geographic location all support Bartlesville as an attractive location for this industry.

Major Activities and Services:

Provide a range of day-to-day office administrative services to clients such as assistance with financial planning, billing and record keeping, personnel, and in physical distribution and logistics.

Provide expert advice and assistance in the fields of writing, modifying, testing and supporting software to meet the needs of a particular customer.

Provide outsourced payroll services for clients' employees, as well as basic bookkeeping services

Rationale:

- Existing local industry and occupational specialization
- Relatively low labor and land costs
- Nonurban location, reduced exposure to interruption
- Computer Science, Business Administration and Business/Commerce programs at Oklahoma Wesleyan University
- Business Information Technology programs at Rogers State University

Table 34
Shared/Back-Office Services
U.S. Overview

Industry	NAICS Code	2010 National Employment	5-Year Projected Percent Change	National Earnings Per Workers
Computer systems design and related services	5415	2,386,109	19%	\$88,955
Office administrative services	56111	747,413	15%	\$54,055
Payroll & Bookkeeping Services	54121	1,465,608	9%	\$50,214

Distribution & Logistics

Bartlesville's accessible and central location, growing workforce, along with the presence of a nearby Wal-Mart distribution center suggest that industries involved in Distribution & Logistics would find the area particularly attractive.

Major Activities and Services:

Distribution of durable & non-durable products.

Operate merchandise warehousing and storage facilities.

Provide consolidation of freight consignments, trade document preparation, packing, crating and otherwise preparing goods for transportation, and logistics consulting services.

Operate refrigerated warehousing and storage facilities.

Rationale:

- Access to US Highway 75
- Location near Tulsa and Tulsa Airport
- Successful existing Wal-Mart Distribution Center
- Growing retail workforce, likely attracted to higher-paying and more stable positions

Table 35
Distribution & Logistics

U.S. Overview

Industry	NAICS Code	2010 National Employment	5-Year Projected Percent Change	National Earnings Per Workers
Freight Packing & Logistics Services	48899	29,932	2%	\$41,724
General warehousing and storage	49311	612,628	9%	\$42,787
Refrigerated warehousing and storage	49312	55,201	4%	\$46,609
General wholesaling	42	6,329,368	3%	\$73,158

Instrumentation/Control Systems

Instrumentation/Control Systems are developing into a manufacturing sector requiring both production and technical expertise. Private industry and government are demanding more accurate electrical/mechanical means for measuring, monitoring and controlling systems and products. Bartlesville's existing energy expertise, industrial sites, and growing workforce are well-suited to meet this industry's demands.

Major Activities and Services:

Manufacturer of measuring, and control instruments.

Manufacturer of a variety of industrial and fluid power valves.

Manufacturer power, distribution, and specialty transformers; switchgear and switchboard apparatus; relays; and industrial controls.

Specialized development, design and utilization of instrumentation and control processes.

Rationale:

- Existing local industry and occupational specialization
- Unique energy industry network/cluster
- Machine Tool/Machinist Program at Tri-County Technology Center
- Applied Technology program at Rogers State University
- Existing industrial sites
- Growing retail workforce, likely attracted to higher-paying and more stable positions

Table 36 Instrumentation/Control systems U.S. Overview

Industry	NAICS Code	2010 National Employment	5-Year Projected Percent Change	National Earnings Per Workers
Electronic instrument manufacturing	3345	422,708	-1%	\$99,430
Industrial valve manufacturing	332911	24,668	2%	\$68,892
Electrical equipment manufacturing	33531	143786	-10%	\$74,607
Engineering services	54133	1,048,598	13%	\$87,548

Tourism Development

Bartlesville has a unique set of historic/cultural assets which can be developed into a significant economic contributor. Tourism development also has the ability to offer balance to the local energy-dominated economy.

Tourism Market Trends:

- Aging baby boomers seeking new domestic venues
- Increase in demand for historic/cultural venues
- Interest in authentic experiences
- Fatigue with packaged theme park experiences
- Demand for safe nonurban drive venues
- Increase in international visitors seeking unique American experiences
- Post-recession repositioning to capture new consumers as incomes return

Bartlesville's Unique Position:

- Truly unique "one-in-the world" attractions, such as:
- Woolaroc Ranch, Museum, Native American Heritage Center and Wildlife Preserve
- Phillips Petroleum Company Museum
- Price Tower
- Access to a growing flexible workforce
- Central location, interstate and airport access
- Community leadership and support

FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

Bartlesville is a unique and dynamic community. Through Phillips Petroleum and now ConocoPhillips, the City has benefited from both corporate and individual benefactors. As a result, it's a forward thinking community that has embraced the arts, has a quality health system, has continued to fund economic development efforts sufficiently to provide both product, e.g., industrial parks, and economic development

service delivery efforts effectively, and is working to enhance its downtown central business district. As a result of Bartlesville's long history of success and focused efforts, we have offered recommendations that will complement the work of the current BDC in its role to help grow the economy of Bartlesville.

One issue related to organization and mission that we heard and observed during our due diligence in Bartlesville is the perceived redundancy or duplicative services of a number of organizations that are engaged in economic development. The BDC has a well defined mission as the community's business development organization. Care should be taken not to expand this mission solely because the BDC is well funded with professional staff. While community leaders may feel comfortable assigning additional responsibilities to the BDC, the Chamber of Commerce, the BRTA and any other organization involved in economic development should each have well defined mission statements and execute specific business plans to fill economic development gaps without diluting BDC's primary industry focus or duplicating services.

Much has been accomplished over the last five months with the BDC. We have had numerous conversations with the President of the BDC to initiate some much needed recommendations early on during our consultative engagement. Those recommendations are not reflected in this document, such as internal reorganization recommendations that have already occurred.

Recommendations for action are categorized under three areas of opportunity:

- 1. Organizational
- 2. Product Marketing³³
- 3. Product Improvement³⁴

The "Product" is considered Bartlesville.

.

³³Product marketing is defined as marketing/promoting or selling the County or region worldwide for business development opportunities and investment.

³⁴Product improvement is defined as the County having the necessary infrastructure, including a favorable business climate that attracts investment to the community. Product improvement is the foundation that allows product marketing to succeed.

"The economies of most big cities are idling. The real entrepreneurial hotbeds are now on the periphery -- where low costs make it possible to thrive in a tough global economy. Thanks to lower housing and labor costs, more favorable regulatory environments, and, in some cases, lower taxes, these smaller cities are proving ideal places for doing business -- especially in a globalized economy in which companies operate under relentless pressure to keep costs low and quality high. In many cases, it is precisely these low costs that allow U.S. companies to successfully compete in industries that often seem all but ready to concede to India and other countries. Rather than sending business overseas, many companies are instead opting to contract with lower-cost domestic suppliers -- a new wrinkle in the outsourcing trend known as "home-shoring." 35

Bartlesville, through a concerted and unified effort, can continue to achieve what many smaller communities are only wishing to accomplish in its economic development efforts.

There are three common denominators with communities that sustain economic development success:

- 1. Product something to market and sell
- 2. A well funded budget
- 3. A professional and proactive staff

We have devised our recommendations to keep these three tenants in mind and for the BDC to control its own destiny, rather than rely heavely on other organizations that would serve as a resource to provide deal flow for the City (such as the OK DOC).

At the end of this chapter is a table that gives specifics of an estimated budget, the recommended organization responsible for implementation and timeline.

ORGANIZATIONAL

(Organizational recommendations include staffing, budget, governance and other related items that allow for the effective service delivery of economic development in Bartlesville.)

- 1. The BDC's budget is approximately \$1,000,000 per year is through public funds from a publicly supported (voter) sales tax. It is a sustainable source of funding that fluctuates solely on the volume of retail sales within the community. We commend the leadership of Bartlesville for using this source of funding as a method to finance economic development initiatives in the community.
- 2. The BDC recently reorganized its economic development function to shift its staff person who was focused on business retention and expansion efforts, to be more generalized as a business development director. We support and validate this change as an opportunity to enhance prospect flow in Bartlesville, especially

-

³⁵Inc. magazine May 2005

- when there are certain limitations on what an economic development program can do to facilitate existing business expansion efforts.
- 3. We heard in our interviews that Bartlesville lacks in retail selection for its citizens (from restaurants to shopping). We were not able to confirm but heard from a number of interviews about resident shopping leakage to Owasso. Though we believe the BDC should focus its efforts on primary job creation, the lack of retail growth has an impact on everything from quality of place characteristics to public funds for local governments. In that regard, we are taking the approach that the **Chamber of Commerce take the lead with retail promotion**, as many Chamber's do nationwide, and have a staff person (part time) whose focus is to develop the demographic case for the expansion of retail, work with others to create a realistic retail strategy and then participate in various trade/marketing shows such as the International Council of Shopping Centers to promote Bartlesville proactively for retail attraction. We believe this marketing initiative should be funded separately and not from local sales tax sources since objections could occur from other business owners that feel public tax dollars create unfair competition.
- 4. As funding for the BDC may increase and deal flow grows, the BDC should consider hiring one additional staff person that would serve as a project manager to direct the BDC's external marketing and sales efforts. This person could also be trained in multi disciplined roles to serve as a business intelligence/research person, which is missing now and is a critical link in staffing a holistic and complete economic development service delivery program.
- 5. The BDC is responsible for the management and administration of the convention and visitors bureau (CVB). The CVB should consider having a visitor's center kiosk at Woolaroc and at the Phillips Petroleum Company Museum, based on the number of visitors annually at each location.

PRODUCT MARKETING

(Product marketing is defined as marketing/promoting or selling Bartlesville worldwide for business development opportunities and investment.)

1. Bartlesville, because of its energy research through ConocoPhillips and Chevron Phillips, along with the communities of Tulsa and Ponca City, also doing some form of energy research, should market itself as the Energy Innovation or Energy Research Corridor, which complements our earlier recommendation of industry targets in the scientific and energy research sectors. By working as a marketing consortium, the region would be able to avail itself of a larger pool of funds to collectively market the area worldwide to prospective businesses, especially to research and development firms within the energy sector. This

branding would not only include electronic and print media, but also highway signage and a unified branding campaign of the region.

- 2. The BDC should conduct a multi faceted print and electronic media campaign to the targeted industry sectors noted previously in the section on Optimal Business Targets. Monthly, followed by quarterly communication to these industry targets from the company names provided by Whittaker Associates, should be a key priority in this upcoming fiscal year.
- Additionally, visitations should occur with those companies that have been qualified from Whittaker as offering the best possibility for relocation or expansion to Bartlesville.
- 4. The BDC's **web site** (which is currently integrated within the Chamber's portal) is your number one marketing tool and as such, **needs to be designed to offer the resources that your specific audience's need.** In summary, our immediate recommendations to enhance the BDC's web site include:
 - Put globally positioned contact information (especially phone) at the top of each page and on all downloadable material.
 - Write a central home-page paragraph that describes the site's purpose and the mission of your organization.
 - Integrate optimized, branded, thematic maps throughout the site to orient and inform your audience as they read related text.
 - Add data to increase substance to the site, focusing on data desired by site selectors and corporate end-users.
 - Restructure navigation to better serve your audiences, especially for recruitment. Consider orienting navigation by audience type.
 - Use a PDF creator so your visitors can customize documents on the fly.
 - Improve traffic to the site by focusing on search engine optimization in your site redesign.
 - Begin to incorporate social media application into your web strategy.
 - Translate a community overview and local statistical data via a PDF into Japanese, Chinese, Korean, German, Spanish, Hebrew (great growth opportunity from Israeli companies) and any other language from countries that have an influx or interest into Bartlesville.
- 5. The public leadership of Bartlesville should work with its legislative delegations in both the State and Congress to get **US HWY 75 from Tulsa to Bartlesville** (where it is limited access) **designated as an Interstate spur** by the US Department of Transportation. This would position Bartlesville in a more

favorable posture by companies and consultants that are analyzing locations based on Interstate accessibility.

- 6. In our review of the BDC's existing collateral material for the marketing and promotion of the City, we believe the BDC should work with its marketing agency to produce new collateral material that will effectively promote Bartlesville successfully. Good promotional material is a necessity for a community to productively advance itself.
- 7. The BDC should consider conducting an **annual familiarization tour (FAM) in Bartlesville** with site selection consultants to inform them on the advantages of doing business in Bartlesville.

PRODUCT IMPROVEMENT

(Product improvement is defined as Bartlesville having the necessary infrastructure, including a favorable business climate that attracts investment to the community.) Product improvement is the foundation that allows product marketing to succeed. Items reviewed for consideration include sites and buildings, transportation infrastructure, utility infrastructure, workforce development, leadership and incentives.

- 1. With the number of engineers and scientists in the community, local officials should explore the possibility of offering a satellite campus of the University of Oklahoma's Mewbourne School of Petroleum and Geological Engineering. This would complement the community's efforts to grow its wage and income structure by focusing on a higher educated workforce, which complements our recommended industry targets. This would also serve as a benefit and service for those with undergraduate degrees in petroleum or mining engineering to pursue Master level courses offered by the University. OSU has a Tulsa campus, and Bartlesville's effort to secure a satellite campus from OU similar to Rogers State in Bartlesville would be significant. The addition of a satellite campus will be looked upon more favorably by potential corporate investors engaged in this business sector.
- 2. The BDC recently acquired 130 acres of property (former golf course) named the Sunset Industrial Park. The property will need infrastructure provided for the tenants and a flexible site plan developed so it can be ready for implementation on an as needed basis. It is our recommendation that the BDC either partner with a developer or undertake alone the development of a multi use flexible building as a tool to attract manufacturing or office related companies associated with our target industry recommendations.
- 3. Mobile entrepreneurs or lone eagles, people who can live and work anywhere based on their jobs and lifestyle, has potential for Bartlesville. This is especially

true for those individuals that may leave the employment of a local employer but choose to stay in Bartlesville High speed internet access and particularly wireless internet, is critical in the attraction and retention of mobile entrepreneurs. The City of Bartlesville installed wireless internet in the downtown business district some time ago but as of April of this year when we last visited, it was not working. We understand that it has not been working for sometime. Wireless should be repaired in the central business district as a service of the City. This sends a message of business support to mobile entrepreneurs and that the community has embraced technology.

- 4. A **venture capital fund or Angel network** should be created to assist small business entrepreneurs in new business start ups. This would be especially helpful to those tenants at the incubator housed at Tri County Technical College. A committee should be utilized to analyze and evaluate business plans.
- 5. Public leadership recognizes that having a redundant and sustainable water supply is an issue in Bartlesville. Without a remedy to that problem, it will serve as an impediment to Bartlesville's effort to expand its economic base. We aren't telling the leadership of Bartlesville something they don't already know. Rather, we are validating the issue that it must be resolved sooner rather than later utilizing State and Federal resources to assist.
- 6. We heard from a number of our interview respondents, including existing employers, that **public transportation** is a necessity in Bartlesville so as to attract people who want to be engaged in the workforce but are limited in participating effectively because they need transportation to and from work. In a subsequent conversation with the City, it is our understanding that discussions regarding public transportation have been ongoing in earnest for the last 18 months, but that changes in city finances has caused this issue to not be top of mind as the City faces other funding challenges. Typically, we have seen public transportation initially funded by Federal funding sources. Many times, that funding source has a sunset provision. We encourage the City to determine that there is a sustainable funding source for the longevity of public transportation should the City move forward so as not to cut services in other areas if Federal sources become depleted.

CONCLUDING THOUGHTS

Bartlesville is a success story. With entrepreneurship, innovation and the quality of its public and private leadership over multiple generations, Bartlesville has been able to position itself as a competitor in a global economy. The challenge is to sustain that position and not become complacent. Bartlesville must look forward and recognize that to succeed it cannot be business as usual. It must be prepared to accept constant and rapid change from the impact of a constantly evolving global economy. Great

companies reinvent themselves to stay viable such as IBM and Apple. Likewise, communities must work to create new clusters of opportunity for economic growth to control their own destiny. We challenge Bartlesville to show its competitors that they will do what is necessary to continue to be a global competitor.

The following table provides a detailed list of each recommendation and a checklist of its status. This document will allow the organization responsible for implementation and its governing board a management tool to monitor its execution.

IMPLEMENTATION GUIDELINES FOR RECOMMENDATIONS

					Statu	5
Recommendation	Responsible Organization	Schedule	Estimated Cost	In Progress	Complete	Incomplete
ORGANIZATIONAL						
Chamber of Commerce should take the lead with retail promotion.	Chamber	2012	\$30K			
2. BDC should consider hiring one additional staff person that would serve as a project manager to direct the BDC's external marketing and sales efforts.	BDC	2012	\$45K			
3. CVB should consider having a visitor's center kiosk at Woolaroc and at the Phillips Petroleum Company Museum.	BDC	2012	NA			
PRODUCT MARKETING						
Market itself as the Energy Innovation or Energy Research Corridor	BDC	2011	\$50K			
Conduct a multi faceted print and electronic media campaign to the targeted industry sectors	BDC	2011- 2014	\$35K per year			
3. Visitations should occur with those companies that have been qualified from Whittaker	BDC	2011- 2014	\$15K per year			
4. Web site needs to be designed to offer the resources that your specific audience's need	BDC	2011	\$30K			
5. Get US HWY 75 from Tulsa to Bartlesville designated as an Interstate spur.	City, County, Chamber, Congressional support	2011	NA			
6. Produce new collateral material that will effectively promote Bartlesville.	BDC	2011, 2012	\$50-60K			
7. Annual familiarization tour (FAM)	BDC	2011- 2014	\$20K per year			
PRODUCT IMPROVEMENT						
Satellite campus of the University of Oklahoma's Mewbourne School of Petroleum and Geological Engineering	Chamber, et al	2012 -	NA			
BDC either partner with a developer or undertake alone the development of a multi use flexible building	BDC, et al	2011	NA			
3. Wireless should be repaired in the central business district	City	2011	NA			

				Status		
Recommendation	ecommendation Schedule		Estimated Cost	In Progress	Complete	Incomplete
4. Venture capital fund or Angel network	BDC, Tri County Tech, Chamber	2012 +	\$2mm+			
5. Water supply	City	-	-			
6. Public transportation	City	-	-
